Session Splitting Guide

Alternative Delivery Formats (8-Session & 6-Session)

Copilot Studio Workshop · Generated April 28, 2026

Session Splitting Guide

Use this guide when delivering the workshop as multiple 2–3 hour sessions instead of the standard two-day format.

Data Sources

- **README estimates**: Per-lab `⏱ Estimated time` from each lab's README (self-paced participant time)
- **Timing guide**: Facilitator-led allocations from `lab-timing-guide.md` (compressed by demo/guidance)
- **Effective time**: README estimate × 1.15 (adds 15% for session intro, recap, Q&A, transitions)

Raw Timing Summary

Day	Labs	README Total	Effective Total
Day 1 (Labs 00–12)	13 labs	530 min (8.8 hrs)	610 min (10.2 hrs)
Day 2 (Labs 13–24)	12 labs	460 min (7.7 hrs)	531 min (8.9 hrs)
Lab 25 (optional)	1 lab	30 min (0.5 hrs)	35 min (0.6 hrs)
Core total	**25 labs**	**990 min (16.5 hrs)**	**~1,141 min (19 hrs)**

> **Note:** The standard two-day format compresses this to ~12 hours of instruction time (6 hrs/day) by using facilitator demos, tighter pacing, and parallel troubleshooting. Multi-session delivery restores closer to full README time because participants work more independently between sessions.

Per-Lab Breakdown

Lab	Title	README Min	Effective Min
00	Environment Setup	45	52
01	Intro to Agents	20	23
02	Copilot Studio Fundamentals	30	35
03	Declarative Agents	60	69

Lab	Title	README Min	Effective Min
04	Solutions	45	52
05	Prebuilt Agents	30	35
06	Custom Agent	75	86
07	Topics and Triggers	60	69
08	Adaptive Cards	45	52
09	Agent Flows	45	52
10	Event Triggers	25	29
11	Publish Agent	30	35
12	Licensing	20	23
13	Loan Processing Agent Setup	45	52
14	Agent Instructions	25	29
15	Multi-Agent	40	46
16	Trigger Automation	40	46
17	Model Selection	30	35
18	Content Moderation	40	46
19	Multimodal Prompts	35	40
20	Dataverse Grounding	40	46
21	Document Generation	45	52
22	MCP Integration	45	52
23	User Feedback	30	35
24	Agent Evaluation	45	52
25	VS Code Extension *(optional)*	30	35

Recommended: 8 Sessions (2–3 hrs each)

Each session includes 10 min for session intro/recap + 5 min wrap-up. Sessions over 2 hrs include a 10 min break.

Session 1 — Getting Started (2 hrs)

Lab	Title	Time
00	Environment Setup	45 min
01	Intro to Agents	20 min
02	Copilot Studio Fundamentals	30 min
—	Session overhead	15 min
—	**Total**	**110 min (~2 hrs)**

Theme: Get everyone signed in, oriented, and navigating Copilot Studio.

Session 2 — Agent Patterns and Reuse (2.5 hrs)

Lab	Title	Time
03	Declarative Agents	60 min
04	Solutions	45 min
05	Prebuilt Agents	30 min
—	Break	10 min
—	Session overhead	15 min
—	**Total**	**160 min (~2.5 hrs)**

Theme: Explore declarative agents, solution packaging, and template reuse before building from scratch.

Session 3 — Build Your Agent (2.5 hrs)

Lab	Title	Time
06	Custom Agent	75 min
07	Topics and Triggers	60 min
—	Break	10 min
—	Session overhead	15 min
—	**Total**	**160 min (~2.5 hrs)**

Theme: Create the Woodgrove Customer Service Agent with grounding, then add structured topic routing.

Session 4 — Interaction and Automation (2.5 hrs)

Lab	Title	Time
08	Adaptive Cards	45 min
09	Agent Flows	45 min
10	Event Triggers	25 min
—	Break	10 min
—	Session overhead	15 min
—	**Total**	**140 min (~2.5 hrs)**

Theme: Connect conversation to action — cards capture input, flows write back to SharePoint, triggers run autonomously.

Session 5 — Publish, Plan, and Loan Processing Agent Setup (2 hrs)

Lab	Title	Time
11	Publish Agent	30 min
12	Licensing	20 min
13	Loan Processing Agent Setup	45 min
—	Session overhead	15 min
—	**Total**	**110 min (~2 hrs)**

Theme: Close Day 1 content (publish, licensing) and bridge into Day 2 by importing the Loan Processing Agent solution. This session can run shorter or be padded with Q&A.

Session 6 — Instructions, Multi-Agent, and Safety (3 hrs)

Lab	Title	Time
14	Agent Instructions	25 min
15	Multi-Agent	40 min
16	Trigger Automation	40 min
17	Model Selection	30 min

Lab	Title	Time
18	Content Moderation	40 min
—	Break	10 min
—	Session overhead	15 min
—	**Total**	**200 min (~3 hrs)**

Theme: The full orchestration-to-safety arc — instruction quality, multi-agent delegation, automation, model choice, and red-team testing.

Session 7 — Enterprise AI: Grounding, Documents, and MCP (3 hrs)

Lab	Title	Time
19	Multimodal Prompts	35 min
20	Dataverse Grounding	40 min
21	Document Generation	45 min
22	MCP Integration	45 min
—	Break	10 min
—	Session overhead	15 min
—	**Total**	**190 min (~3 hrs)**

Theme: Enterprise-grade capabilities — read documents, ground in live data, generate business artifacts, extend with MCP tools.

Session 8 — Quality, Feedback, and Wrap-up (2 hrs)

Lab	Title	Time
23	User Feedback	30 min
24	Agent Evaluation	45 min
25	VS Code Extension *(optional)*	30 min
—	Session overhead	15 min
—	**Total**	**120 min (~2 hrs)**

Theme: Close the loop — feedback capture, evaluation-driven quality, and the optional developer workflow. Lab 25 can be dropped or assigned as self-paced homework if the session runs long.

Session Summary

Session	Theme	Labs	Duration
1	Getting Started	00–02	~2 hrs
2	Agent Patterns and Reuse	03–05	~2.5 hrs
3	Build Your Agent	06–07	~2.5 hrs
4	Interaction and Automation	08–10	~2.5 hrs
5	Publish and Lending Setup	11–13	~2 hrs
6	Instructions, Multi-Agent, and Safety	14–18	~3 hrs
7	Enterprise AI	19–22	~3 hrs
8	Quality and Wrap-up	23–25	~2 hrs
Total		**26 labs**	**~19.5 hrs**

Alternative: Compressed 6-Session Option (3 hrs each)

Session	Labs	Duration	Theme
1	00–05	3 hrs	Foundation: Setup through prebuilt agents
2	06–09	3 hrs	Build: Custom agent, topics, cards, flows
3	10–14	3 hrs	Bridge: Events, publish, licensing, Loan Processing Agent setup, instructions
4	15–18	3 hrs	Orchestrate: Multi-agent, automation, model selection, safety
5	19–22	3 hrs	Enterprise: Multimodal, grounding, doc gen, MCP
6	23–25	2 hrs	Close: Feedback, evaluation, VS Code
Total		**~17 hrs**	

Delivery Notes

- **Breaks:** Sessions over 2 hours should include at least one 10 min break.
- **Buffer:** The 15% overhead accounts for session start/stop, recap, and Q&A. Increase to 20% if participants are less experienced.
- **Lab 25:** Optional in all formats. Can be assigned as self-paced homework.
- **Session 5** bridges Day 1 close into Day 2 start. This is the natural pivot point between the Foundation and Enterprise tracks.
- **Thematic grouping** ensures each session has a clear learning outcome, not just a time-based split.
- **Between sessions:** Remind participants to keep their environment, SharePoint site, and agent intact. Each session builds on the previous one.
